

Create a web page in Moodle

Overview

This page contains basic instructions on how to create a web page in Moodle. A Moodle Page displays to the student as a single, scrollable screen.

With the Moodle text editor, you do not need to have expertise in any specific coding languages to create a page.

Before you copy or link to work by other authors in your Moodle web page, read the [Course Materials and Copyright](#) page to find out the correct procedures to follow.

When to use

Use these instructions when you want to present course information to your students in a single, scrollable page.

Benefits

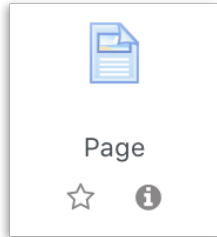

A web page is a useful way to present a single, self-contained concept, example or other element of learning material.

Guide

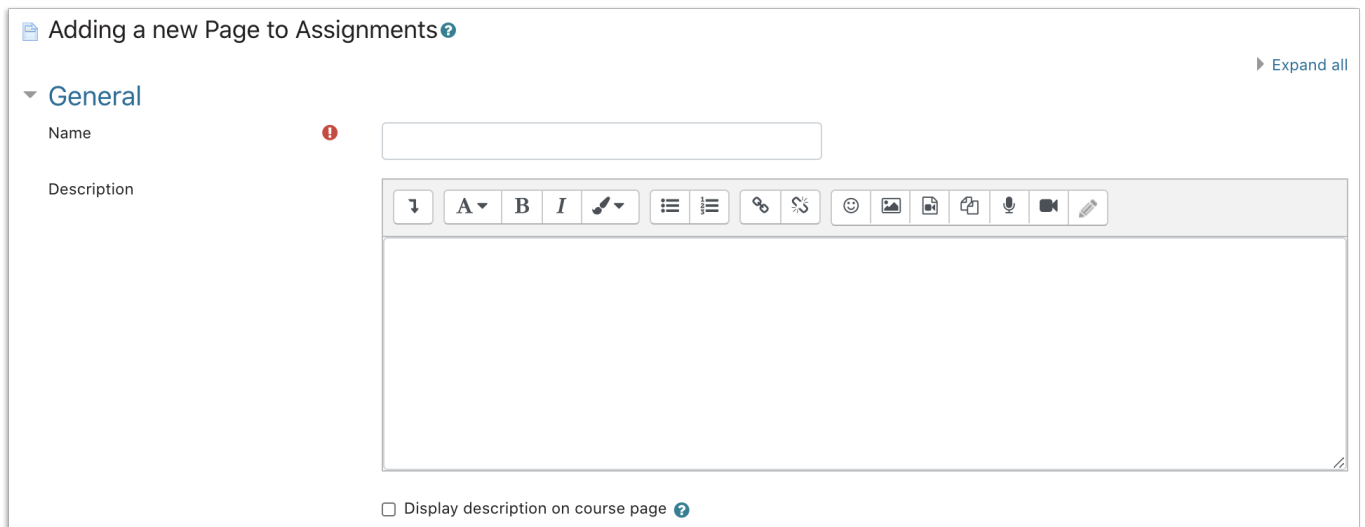

Step by step instructions

Create a web page

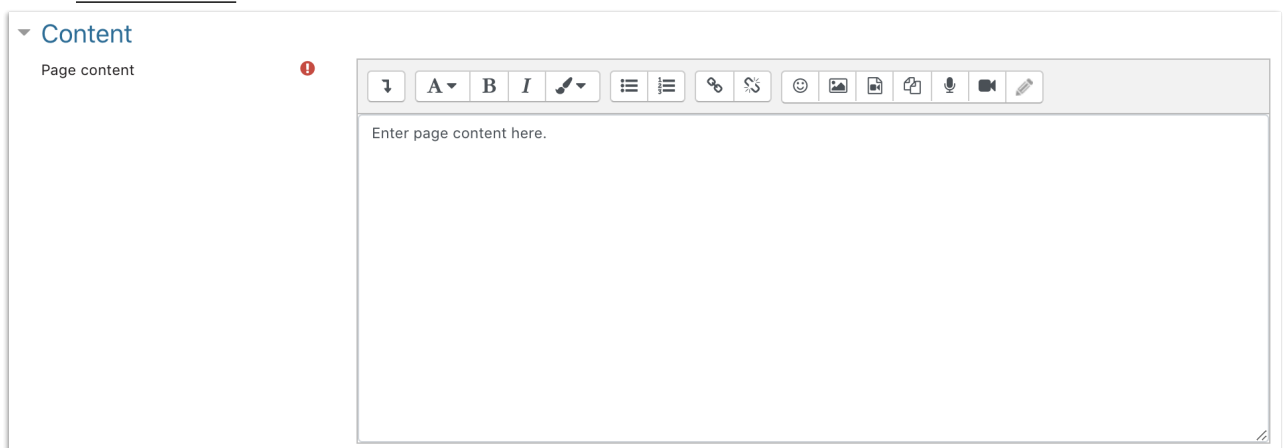

1. Click **Turn editing on** at the top right of the page .
2. In the appropriate section, click **Add a resource or activity**, select **Page** from the pop-up activity chooser.

3. On the *Adding a new Page* page, enter a page **Name** (to display in the section content list) and a **Description**, if you wish.

4. Under **Content**, add **Page content e.g:**
 - o enter text, embed images and video, add URL's to other websites
 - o if you are copying text from Microsoft Word, use one of the methods described on this [page](#).
 - o to create a link from your web page to an individual topic or activity on the course home page, follow these [instructions](#).

5. Click **Appearance**, then select whether you want to **Display page name** or **Display page description** on the

course home page.

▼ Appearance

Display Open ▾

Display page name

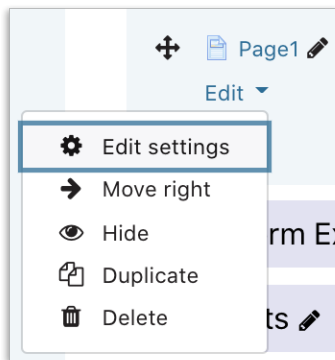

Display page description

Display last modified date

6. Complete any other appropriate sections for this web page, and click **Save and display** to preview the page.

Save and return to course Save and display Cancel

7. To make any changes to the page:
- click Edit under the Page activity, then
 - click the Edit settings .

Advanced guide

If, in creating your web page, you discover that it will require students to scroll through a large quantity of material, consider breaking up the information and presenting it in **Book** form.

Additional information

Further assistance

If you experience technical or other issues, consult the [Where to get help](#) page.
